

Cincinnati Children's Healthcare Education Website

Research Presentation

6 February 2015

DESIGN TEAM

Blake Lane - Project Leader
Ryan Fennessey - Motion Design
Kyle Cypher - Interaction Design

Project Brief

Currently, preparation of foster youth for entry into independent living focuses on a broad range of skills and occurs 6-18 months prior to aging out of foster care in three settings: foster placement, classroom didactics, and mandated healthcare visit.

- It is the expectation and responsibility of adults in a teen's current placement (i.e., foster parents, staff in group homes, caseworkers) to promote independent living skills in all youth ages 15 and older.
- Second, there is a required classroom-based curriculum that all youth must complete before they are moved into their own apartment.
- Finally, there are mandated visits with the CHECK Foster Care Clinic at CCHMC, which provides comprehensive health evaluations concurrent with a move to independent living.

Problem Statement

Problem

There are not systematic education materials provided to youth that addresses:

- health
- access to healthcare
- healthcare utilization
- how to navigate the healthcare system

Problem Statement

Problem

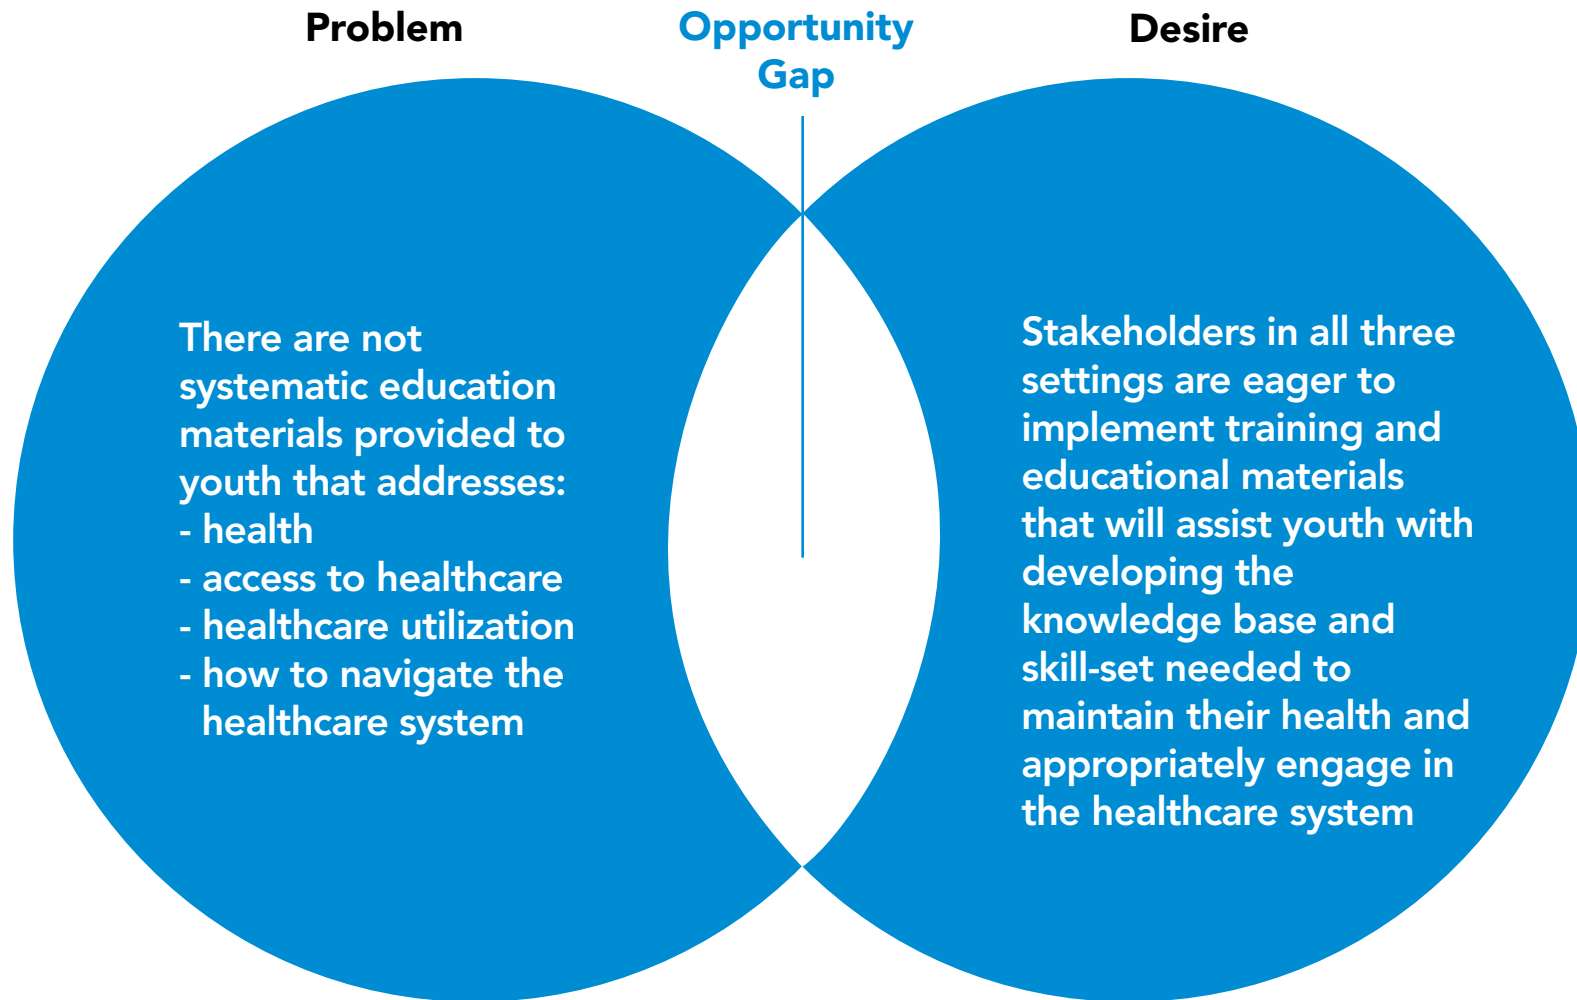

There are not systematic education materials provided to youth that addresses:

- health
- access to healthcare
- healthcare utilization
- how to navigate the healthcare system

Desire

Stakeholders in all three settings are eager to implement training and educational materials that will assist youth with developing the knowledge base and skill-set needed to maintain their health and appropriately engage in the healthcare system

Problem Statement

Goals & Deliverables

1. Create educational materials that can be tested for efficacy and implemented with:

- Independent living programs
- Healthcare providers
- Foster and group homes

2. Develop educational materials for independent living classes and clinical settings.

Design Thinking Strategies

1

Applying

past research methodologies and outcomes to current context.

2

Connecting

with stakeholders through creative processes.

3

Visualizing

data and insights collected.

Research Goals

Investigate

- Why do youth in foster care access the Internet?
- What styles of websites and features of websites attract youth in foster care?
- How can those website styles and features be utilized to entice youth in foster care to a healthcare website?

Research Goals

Understand

- How can the role of stakeholders in youth in foster care's lives support the utilization of a healthcare website with the youth?
- How can this role act as a trigger for engagement between youth in foster care and the healthcare system to create an ongoing relationship between healthcare and youth in foster care?

Questionnaires and Surveys

Internet Usage

Age: _____
M/F: _____

On average, how often do you use the internet?
☐ 5-8 times a day
☐ 1-4 times a day
☐ A few times a week
☐ Less than a few times a week

On average, how many hours a day do you use the internet?
☐ 0-1 hours a day
☐ 2-4 hours a day
☐ 5-6 hours a day
☐ More than 6 hours a day

What do you find to be the biggest problems in using the internet?
(Check all that apply)
☐ Not being able to return to a page I once visited
☐ It takes too long to view/download pages
☐ Encountering links that do not work
☐ Sites that require me to register with them
☐ Sites with too many graphics or useless graphics
☐ Other _____

What do you primarily use the internet for?
(Please check all that apply)
☐ Education
☐ Shopping/gathering product information
☐ Social media & Communication with others
☐ Gathering information for personal needs (healthcare, banking etc)
☐ Wasting time/gaming

Which of the following can't you live without?
(Check all that apply)
☐ Email
☐ Social media
☐ Cell phone
☐ Streaming audio/video over the Internet

How do you find out about new websites?
(Check all that apply)
☐ Books
☐ Friends
☐ Follow hyperlinks from other Web pages
☐ Internet search engines
☐ Magazines/newspapers

Please check into the boxes that apply.

	Never	Seldom	Sometimes	Most of the time
To what extent would you say you use the internet to search for specific information?				
To what extent would you say you use the internet to express yourself?				
To what extent would you say you use the internet to have fun and explore?				

The Internet is a versatile tool. Please indicate how often you have used the internet for each of the following categories during the past 6 months.

	Never	Least often monthly	Weekly	Daily
Accessing online news				
Purchasing products				
Accessing reference materials				
Accessing research reports & products				
Accessing financial information				
Accessing health/medical information				
Accessing social media				
Accessing online job listings				
Accessing online financial aid				
Accessing online maps				

Thank You!

Research Outcomes

Total Time Spent

Total Overall Time - 60 Hours

Research Outcomes

Interview Insights

BAIR FOUNDATION

- Majority of the time spent online is on social networking sites and communicating with friends.
- Youth are sensitive and usually unwilling to discuss issues such as sexual health and mental health with foster parents.
- Modules are the best way to communicate educational information.

COYOTE CAPASSO

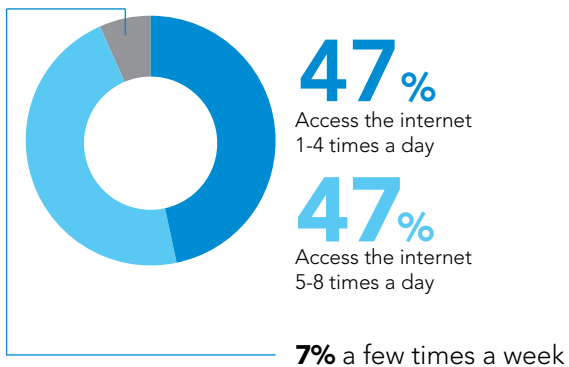

- One of the most confusing parts of the healthcare system for youth is Medicaid and insurance.
- Literacy and comprehension levels are generally low, speaking simply and clearly is important in communication.
- Youth are very tech savvy, almost all have phones and access to a computer.

3 Style Takeaways

Flat

Pros

- "Very clear and easy to navigate"
- "I like the openness of the layout and easy to follow look"

Cons

- "Too plain"
- "It doesn't appear to have color or exciting information"

Texture

Pros

- "Artsy"
- "Looks unique and fun"

Cons

- "Hard to read"
- "Looks confusing"

Classic

Pros

- "Good for kids"
- "Looks very educational"

Cons

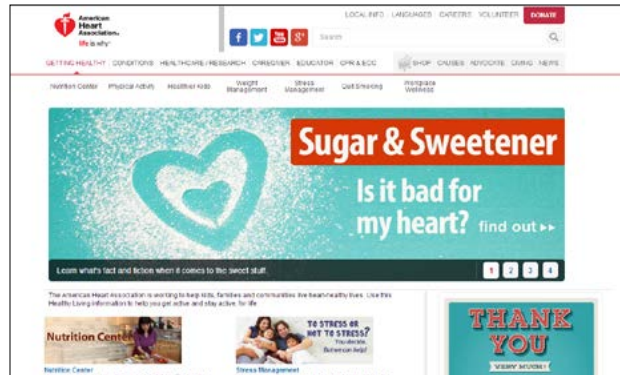

- "Looks generic"
- "Boring"

Research Methodologies

Benchmarking Education Healthcare Websites

<http://yourgenesyourhealth.org>

Research Methodologies

Benchmarking Education Healthcare Websites

<http://yourgenesyourhealth.org>

Pros

- Easy to access information
- Simple navigation
- Clear, understandable text

Cons

- Uninviting appearance
- Small layout
- Unresponsive

<http://teenmentalhealth.org>

Pros

- Friendly and inviting
- Good use of color and illustration
- Formatted for versatile use

Cons

- Doesn't look like a healthcare website
- Has a portfolio/blog feel

What's Next?

IDEATION & PROTOTYPING

- Content activity
- Organize information architecture
- Develop different communication concepts based off of feedback
- Create a functioning prototype for testing by February 26th

BRANDING

- Name the Healthcare Guide
- Establish a logo and identity
- Incorporate brand into the website
